

CONTENTS OF VOLUME 4

- Angus, T. A. See Heimpel, A. M., 531.
- Barrett, J. M. See Perlman, D., 9.
- Bearns, R. E. and Girard, K. F. The effect of pasteurization on *Listeria monocytogenes*, 55.
- Bernier, B. The production of polysaccharides by fungi active in the decomposition of wood and forest litter, 195.
- Bird, F. T. Histopathology of granulosis viruses in insects, 267.
- Bishop, C. T. and Blank, F. The chemical composition of the Actinomycetales: Isolation of a polysaccharide containing D-arabinose and D-galactose from *Nocardia asteroides*, 35.
- Blank, F. See Bishop, C. T., 35.
- Bollen, W. B. See Gilmour, C. M., 287; McGarity, J. W., 303.
- Bradley, R. H. E. See MacKinnon, J. P., 63.
- Bradley, R. H. E. and MacKinnon, J. P. Effects of trichothecin on some viruses transmitted by aphids, 555.
- Brock, T. D. The effect of salmine on bacteria, 65.
- Carey, B. J. See Skerman, V. B. D., 243.
- Cheldelin, V. H. See Reed, D. J., 627.
- Cinitis, M. See Hotchin, J. E., 149.
- Clark, D. S. and Wallace, R. H. Carbohydrate metabolism of *Pullularia pullulans*, 43.
- Oxidation of compounds in the Krebs cycle by *Pullularia pullulans*, 125.
- Connell, G. E. and Watson, R. W. Incorporation of C¹⁴ into bacterial peptides, 633.
- Corke, C. T. See Douglas, R. J., 551.
- Craig, B. M. See Hougen, F. W., 521.
- Damsky, L. See Gilmour, C. M., 287.
- Davis, B. R. See Ewing, W. H., 89.
- Davis, B. R. and Ewing, W. H. Six new *Escherichia coli* H antigens, H41 to H46, 517.
- Denton, G. D. See Murray, E. G. D., 593.
- De Repentigny, J. and Sonea, S. Détection microscopique de la fluorescence primaire chez les bactéries, 17.
- Diena, B. B. See Murray, E. G. D., 593.
- Douglas, R. J. and Garrard, E. H. The technique of passive hemagglutination as applied to streptomycetes, 557.
- Douglas, R. J., Robinson, J. B., and Corke, C. T. On the formation of protoplast-like structures from streptomycetes, 551.
- Dowding, E. S. Nuclear streaming in *Gelasinospora*, 295.
- Dubreuil, R. and Pavilanis, V. Emploi d'un milieu synthétique simplifié pour la culture in vitro de cellules animales et du virus de la poliomyélite, 543.
- Durham, N. N. Studies on the metabolism of *p*-nitrobenzoic acid, 141.
- Eagon, R. G. Localization of glucose, gluconate, and glucose-6-phosphate oxidation systems in extracts of *Pseudomonas fluorescens*, 1.
- Elliker, P. R. See MacGregor, D. R., 499.
- Ewing, W. H. See Davis, B. R., 517.
- Ewing, W. H., Reavis, R. W., and Davis, B. R. Provisional *Shigella* serotypes, 89.
- Fitz-James, P. C., Toumanoff, C., and Young, I. E. Localization of a toxicity for silkworm larvae in the parasporal inclusion of *Bacillus cereus* var. *alesti*, 385.
- Frappier, A. See Portelance, V., 409.
- Gagnon, J. See Robinson, J., 345.
- Garrard, E. H. See Douglas, R. J., 557.
- Gerhardt, P. See MacDonald, R. E., 109.
- Gilmour, C. M. See McGarity, J. W., 303.
- Gilmour, C. M., Damsky, L., and Bollen, W. B. Manometric gas analysis as an index of microbial oxidations and reductions in soil, 287.
- Girard, K. F. See Bearns, R. E., 55.
- Goldman, C. L., Litsky, W., Mandel, M., and Little, H. N. An assay procedure and partial characterization of a factor in yeast autolysate essential for the growth of *Acetobacter gluconicum* strain 2G, 463.
- Gorham, P. R. See Hughes, E. O., 225.
- Gozyński, E. A. See Neter, E., 371.
- Greig, A. S. Continuous cultivation and susceptibility to bovine viruses of cell lines derived from bovine embryonic tissues, 487.
- Griffiths, B. W. See Logan, J. E., 321.
- Harrell, W. K. Stimulation of glucose oxidation in extracts of bacterial spores by dipicolinic acid, 393.
- Haskins, R. H. Hyphomycetous fungi: *Volucrispora aurantiaca* n. gen., n. sp.; *V. ornithomorpha* (Trotter) n. comb.; and *Tricellula curvatis* n. sp., with the genus *Tricellula* emended, 273.

- Heimpel, A. M. and Angus, T. A. The taxonomy of insect pathogens related to *Bacillus cereus* Frankland and Frankland, 531.
- Hill, D. A. and Thornton, H. R. Lactobacilli in Edmonton dairy products, 215.
- Hotchin, J. E. and Cinits, M. Lymphocytic choriomeningitis infection of mice as a model for the study of latent virus infection, 149.
- Hougen, F. W., Craig, B. M., and Ledingham, G. A. The oil of wheat stem rust uredospores. I. The sterol and carotenes of the unsaponifiable matter, 521.
- Hughes, E. O. See Zehnder, A., 399.
- Hughes, E. O., Gorham, P. R., and Zehnder, A. Toxicity of a unialgal culture of *Microcystis aeruginosa*, 225.
- Husain, I. and McDonald, I. J. Characteristics of an extracellular proteinase from *Micrococcus freudenreichii*, 237.
- Jackson, A. W. and Little, R. M. Staphylococcal toxins. II. Factors affecting hemolysis by δ -lysin, 435.
- Staphylococcal toxins. III. Partial purification and some properties of δ -lysin, 453.
- Jackson, A. W. and Mayman, D. Staphylococcal toxins. IV. Factors affecting hemolysis by β -lysin, 477.
- James, N. Soil extract in soil microbiology, 363.
- Katznelson, H. Hexose phosphate metabolism by *Acetobacter melanogenum*, 25.
- See also Stevenson, I. L., 73; Sutton, M. D., 493.
- Kelen, A. E. Production of OB diagnostic antisera from motile *Escherichia coli* strains, 581.
- Klumpp, D. J. See Neter, E., 371.
- Laird, M. A secondary effect of DDT upon the aquatic microflora and microfauna, 445.
- Lark, K. G. Abnormal growth induced by penicillin in a strain of *Alcaligenes fecalis*, 165.
- Variation during the cell-division cycle in the penicillin induction of protoplast-like forms of *Alcaligenes fecalis*, 179.
- Ledingham, G. A. See Hougen, F. W., 521.
- Litchfield, J. H. and Ordal, Z. J. The oxidative metabolism of *Rhodotorula gracilis*, 205.
- Litsky, W. See Goldman, C. L., 463.
- Little, H. N. See Goldman, C. L., 463.
- Little, R. M. See Jackson, A. W., 435, 453.
- Lockhart, W. R. Interconversion of base 10 and base 2 logarithms, 421.
- Logan, J. E., Griffiths, B. W., and Mason, M. A. Studies on the clearance of radioiodinated pertussis vaccine from the lungs of immunized and non-immunized mice following intratracheal administration, 321.
- Lüderitz, O. See Neter, E., 371.
- McDonald, I. J. Effect of amino acids on utilization of sodium caseinate by *Streptococcus liquefaciens* and *Streptococcus zymogenes*, 81.
- See also Husain, I., 237.
- MacDonald, J. C. Synthesis of aspartic acid by *Lactobacillus arabinosus*, 335.
- MacDonald, R. E. and Gerhardt, P. Bacterial permeability: The uptake and oxidation of citrate by *Escherichia coli*, 109.
- McDonough, M. W. and Martin, S. M. The hexosemonophosphate pathway in *Aspergillus niger*, 329.
- McGarity, J. W., Gilmour, C. M., and Bollen, W. B. Use of an electrolytic respirometer to study denitrification in soil, 303.
- MacGregor, D. R. and Elliker, P. R. A comparison of some properties of strains of *Pseudomonas aeruginosa* sensitive and resistant to quaternary ammonium compounds, 499.
- MacKinnon, J. P. See Bradley, R. H. E., 555.
- MacKinnon, J. P. and Bradley, R. H. E. Aphids remain infective with turnip-latent virus after a molt, 63.
- MacRae, I. C. See Skerman, V. B. D., 243.
- Mandel, M. See Goldman, C. L., 463.
- Mankiewicz, E. Agar diffusion precipitation and complement fixation tests applied to the study of the antigenic relationships between chromogenic acid-fast bacteria and *Mycobacterium tuberculosis*, 565.
- Martin, S. M. Production of extracellular polysaccharides by *Mucor racemosus*, 317.
- See also McDonough, M. W., 329.
- Mason, M. A. See Logan, J. E., 321.
- Mayman, D. See Jackson, A. W., 477.
- Murray, E. G. D., Denton, G. D., Stevenson, J. W., and Diena, B. B. A toxin-inactivating substance (Noxiversin) from *Penicillium cyaneo-fulvum* (Biourge), 593.
- Neter, E., Gorzynski, E. A., Westphal, O., Lüderitz, O., and Klumpp, D. J. The effects of protamine and histone on enterobacterial lipopolysaccharides and hemolysis, 371.
- Noble, E. P., Reed, D. R., and Wang, C. H. Utilization of acetate, pyruvate, and CO₂ by *Penicillium digitatum*, 469.
- Ordal, Z. J. See Litchfield, J. H., 205.
- Pavlanis, V. See Dubreuil, R., 543.

- Perlman, D. and Barrett, J. M.** Biosynthesis of cobalamin analogues by *Propionibacterium arabinosum*, 9.
- Peterson, E. A.** Observations on fungi associated with plant roots, 257.
- Portelance, V. and Frappier, A.** Some biological properties of BCG after the extraction of lipids: the power to irritate tissues, the ability to prepare for and to evoke Bail's phenomenon, and the power to sensitize to tuberculin, 409.
- Quadling, C.** See Sutton, M. D., 493.
- Reavis, R. W.** See Ewing, W. H., 89.
- Reed, D. J., Cheldelin, V. H., and Wang, C. H.** The biosynthesis of some amino acids in *Penicillium digitatum*, 627.
- Reed, D. R.** See Noble, E. P., 469.
- Robinson, J. B.** See Douglas, R. J., 551.
- Robinson, J., Thatcher, F. S., and Gagnon, J.** Studies with staphylococcal toxins. IV. The purification and metallic requirements of specific hemolysins, 345.
